CSS and HTML Deliverable

Objective:

- To be able to create 3-page simple website using HTML and CSS
- To be apply CSS to HTML pages
- Organize contents of a webpage using different HTML tags

Details:

The deliverable must contain 3 webpages: index.html, profile.html and contactus.html. index.html will be freestyle. You can add anything that you feel can enhance the look and design of your webpage. profile.html must have 3 sections: section1: Personal Information, section2: Educational Background and section3: Skills and Hobbies. contactus.html will contain an html form with the following: Name, Email and Message.

There will be four items in the menu: home, profile, contact us and my fb. The 'my fb' is an external link that will redirect to your FB profile page.

You can use the example code given as base layout. You are not limited to it. You can create your own layout as you want.
